

OUR TEAM

Our designers and builders are problem solvers. From structural challenges to innovative low tech solar heating systems, we up for the task.

Owner Noah Grunberg has been designing and building appropriate dwellings for 25 years, beginning as an apprentice to the Taliesin Architects, established by the late Frank Lloyd Wright. He has also renovated numerous mid-century modern houses in the Boston area.

PASSIVE SOLAR HOUSE KITS

For those wanting to build their own house, Noble Home designs and manufactures house kits using our unique building system. Contact us or view more information at our website.

DESIGN-BUILD

DESIGN-BUILD

From concept to completion, our design-build service takes all the guess work out of building your high performance or off-grid home.

Noble Homes are based on some basic design and environmentally sound principles:

- Every house should be organic to its building site
- Construction should be simple with as few layers and components as possible
- Materials should be time tested, non-toxic and in as natural a state as possible

CONSTRUCTION

A variety of construction methods may be employed in a Noble Home design as appropriate to the individual building site, customer, and budget. We have experience in earth-berm, straw bale, SIPs as well as conventional construction.

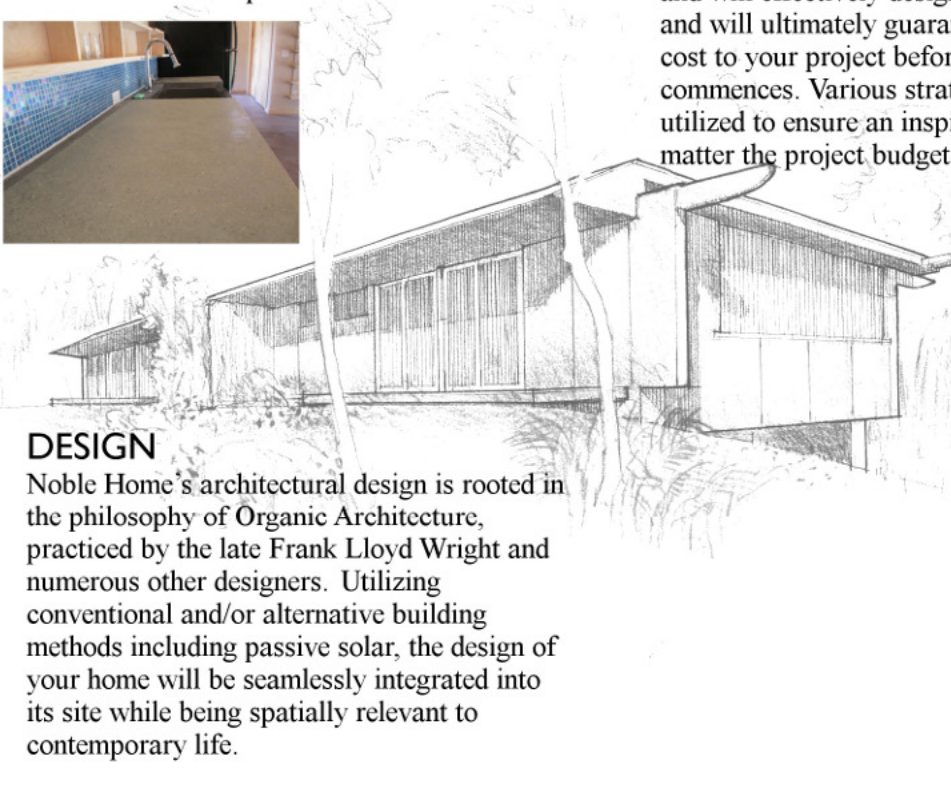

BUDGET

Due to our design-build service, we can and will effectively design within a budget, and will ultimately guarantee a finished cost to your project before construction commences. Various strategies can be utilized to ensure an inspiring space no matter the project budget or size.

DESIGN

Noble Home's architectural design is rooted in the philosophy of Organic Architecture, practiced by the late Frank Lloyd Wright and numerous other designers. Utilizing conventional and/or alternative building methods including passive solar, the design of your home will be seamlessly integrated into its site while being spatially relevant to contemporary life.

WORKING WITH US

- **INITIAL CONSULTATION:** Visit us to learn more about our work and discuss preliminary visions for your project.

- **DESIGN PHASE:** We will help you develop a program. We then create a schematic design proposal and execute engineered construction documents, all within a fixed fee.

- **CONSTRUCTION:** Noble Home will contract and oversee all phases of construction as required and will ensure compliance with the construction documents.

- **SWEAT EQUITY:** We welcome sweat equity investment by owners when appropriate. This is a great way to bring down costs.
